

Grow@tcs: Microsoft Azure Developer

Do you want to be part of shaping the digital future? Do you want to develop your skills in challenging jobs? Tata Consultancy Services (TCS) is looking for an early career talent just like you!

Start your career as a Grow@TCS trainee !

As a Grow@TCS developer, you will get a permanent position at an exciting role where you will get to try your wings on a variety of projects. In the first months of the programme, you will be part of TCS' pan-European internship programme - Grow@TCS - which will give you the best possible start to your career. During these months, you will go through an extensive training programme with other European interns and learn more about your role, the IT consulting industry, projects and our company culture. At the end of the training programme, you will be ready to move on to a client project, where you will be supported by a buddy, a mentor and your manager. They will support you just until you are ready to stand on your own two feet and be able to act independently in your role.

As part of our Microsoft Azure practice and our Manufacturing department, you will work on one of our programs for a major French car manufacturer.

- First, you be first trained on the Microsoft Azure public cloud platform as well as on our offers and tools. Then you will deepen your new knowledge on Azure IoT and the Microsoft Connected Vehicle Platform (MCVP). This last training will be done with our global teams.
- You will then participate in the implementation of a PoC/MVP on one of the target features of the program and its ambitions (Data Monetization, Consent Management RGPD, Car service,...). You will be involved in all phases of the project: needs analysis (design thinking), architecture, design, implementation, acceptance and deployment in an Agile/DevOps approach.
- You will contribute to the French localization of MCVP global service offerings and associated "IP solutions" and to their adaptation for the French market.
- Finally, you will contribute to a market study of these services on the automotive market.

Technical environment :

- Azure PaaS
- Azure Data Platform
- Azure MCVP

Desired experience/background:

Grow@tcs: Microsoft Azure Developer

- Post graduation in IT, Engineering/Management (BAC + 5).
- .NET development. Cloud knowledge is a plus.
- Basic knowledge of project management Excellent verbal and written communication skills
- Languages: fluent in both French and English

We offer you the opportunity to:

- Develop your understanding of the different business processes
- Develop your overall understanding of the IT industry as a whole, as well as your ability to learn new things in diverse projects
- Start an interesting career where you have the opportunity to continuously develop your skills through different courses and trainings - and thus contribute to your own career development
- Collaborate with world-leading IT experts in one of the world's largest consultancies
- Get complete technical skills of the Azure Cloud Platform
- Teamwork and project mode

Start date: September 2021
